The 2026 Digital Marketing Audit Checklist

A practical, 40-point self-audit for your website, SEO, Google presence, paid ads and lead funnel — built by Ratech Global.

Work through each section below and tick the boxes you can honestly say are done. Any box you can't tick is a growth opportunity — and usually a quick win. Aim to fix the easy ones this week, and plan the bigger ones over the month.

1. Website & Technical Health

- [ ] Site loads in under 3 seconds on mobile (test on 4G, not just WiFi).
- [ ] Every page works on mobile — no cut-off text, tap targets big enough.
- [ ] HTTPS padlock shows on every page (SSL active).
- [ ] There is a clear call-to-action (Call / WhatsApp / Book) above the fold on every key page.
- [ ] No broken links or 404 pages (check menus and footer links).
- [ ] Favicon, logo and business name are consistent across the site.

2. Search Engine Optimization (SEO)

- [ ] Every important page has a unique, keyword-focused title and meta description.
- [ ] One clear H1 heading per page that matches what the page is about.
- [ ] Target keywords include your city/region if you serve local clients.
- [ ] Images have descriptive alt text and compressed file sizes.
- [ ] An XML sitemap exists and is submitted to Google Search Console AND Bing Webmaster.
- [ ] robots.txt allows search engines AND AI crawlers (GPTBot, ClaudeBot, PerplexityBot).
- [ ] Internal links connect related pages (services link to relevant blog posts).

3. Google Business Profile & Local

- [ ] Google Business Profile is claimed, verified and 100% complete.
- [ ] Business name, address and phone (NAP) are identical everywhere online.
- [ ] Correct primary category is set, plus every service listed.
- [ ] At least 10+ genuine Google reviews, with owner replies.
- [ ] Fresh photos and a post added within the last 30 days.

4. Paid Ads (Meta & Google)

- [ ] Conversion tracking (Pixel / Google Ads tag) is installed and firing correctly.
- [ ] Each campaign has ONE clear goal (leads, sales, calls) — not mixed.
- [ ] Ad creative is tested with at least 3 variations per campaign.
- [ ] Landing page matches the ad's promise (message match).
- [ ] You know your cost-per-lead and ROAS for every active campaign.
- [ ] Retargeting is running for visitors who didn't convert.

5. Content & Social Proof

- [ ] A blog with helpful, up-to-date articles (not empty or one post).
- [ ] Each service has its own dedicated page with real detail.
- [ ] Real testimonials with names, results and — ideally — photos.
- [ ] Case studies show a clear problem to solution to result story.
- [ ] Active, consistent posting on the 1–2 platforms your customers actually use.

6. Conversion & Funnel

- [ ] A free lead magnet captures emails from visitors not ready to buy.
- [ ] Forms are short — ask only for what you truly need.
- [ ] WhatsApp / instant chat is available (one clear button, not several).
- [ ] Pricing is transparent, with an international currency shown if you serve abroad.
- [ ] A thank-you page or auto-reply confirms every enquiry.
- [ ] An email follow-up sequence nurtures leads who don't buy immediately.

7. Analytics & Measurement

- [ ] Google Analytics 4 is installed and tracking key events (form, call, WhatsApp).
- [ ] You review traffic and lead sources at least once a month.
- [ ] Core Web Vitals / page speed are monitored (e.g. PageSpeed Insights).
- [ ] You test how your brand appears in ChatGPT, Perplexity and Google AI Overviews.
